RE: Administrative Order by Consent: GHR Foundry: Dayton, Ohio  
Scheduled Field Activity

Dear Mr. Steadman:

In accordance with the approved revised Work Plan, WESTON has completed contractor selection for sampling and removal activities to be conducted at the former GH&R Foundry site. Site activities will be performed per the attached schedule.

In response to questions posed by Tom Buchan (Ohio EPA), WESTON would like to clarify the process in which the PCB wastes will be handled. The contractor (Laidlaw) will band and ship palletized capacitors as PCB Waste to either Deerpark, Texas or Port Arthur, Texas to be incinerated. No attempt will be made to field sample the capacitors.

Drummed PCB liquids will be either bulk shipped to Tucker, Georgia as PCB Waste for detoxification, or will travel in drums to Laidlaw's TSDF in Twinsburg, Ohio to be bulked for disposal (detoxification or incineration).

Transformers will be shipped intact to Twinsburg, to be drained and appropriately rinsed. Transformer carcasses will then be shipped to Ashtebula, Ohio to be disposed of (smelted). Transformer liquids will be bulked for disposal (detoxification or incineration).

In all cases mentioned above, the waste will be shipped as PCB waste. If testing proves that the liquids are not considered PCB waste, a manifest correction will be made and signatures will be affixed.

We plan to be on site to conduct sampling on Thursday, 22 May 1997.

If you have any questions regarding this notification, please contact me or Michael May at (513) 825-3440.

Very truly yours,

ROY F. WESTON, INC.
